

PV Oil is one of the biggest Oil Distribution company in Vietnam, under Petrovietnam. Below is a photo of 3 new tanks installed at CaiMep Condensate Plant.

In 2009, we upgraded FuelsManager from V4 running Windows NT to Varec FuelsManager V.7 running windows XP for PV Oil CaiMep Condensate Plant

Scope of supply includes Radar Tank Gauges, Average Temperature Probes, Tank Side Indicators, Shutdown valves and field instruments for the tanks.

Also, we have installed and commissioned new RTU to connect 3 tanks field instruments and communicate with Yokogawa CS3000 DCS system in the plant.
